ZenSolar Solar Ownership Guide

Rent to own solar.
Pay it off and then
it is yours.

Own your solar system without paying the full price upfront.

Do you end up owning the system?

Rent to own, lease and PPA get used as if they mean the same thing. They do not.

Rent to own

Yes, always.

Lease

It depends on the agreement.

PPA

No, you only buy the power. For businesses only.

1. We size your system

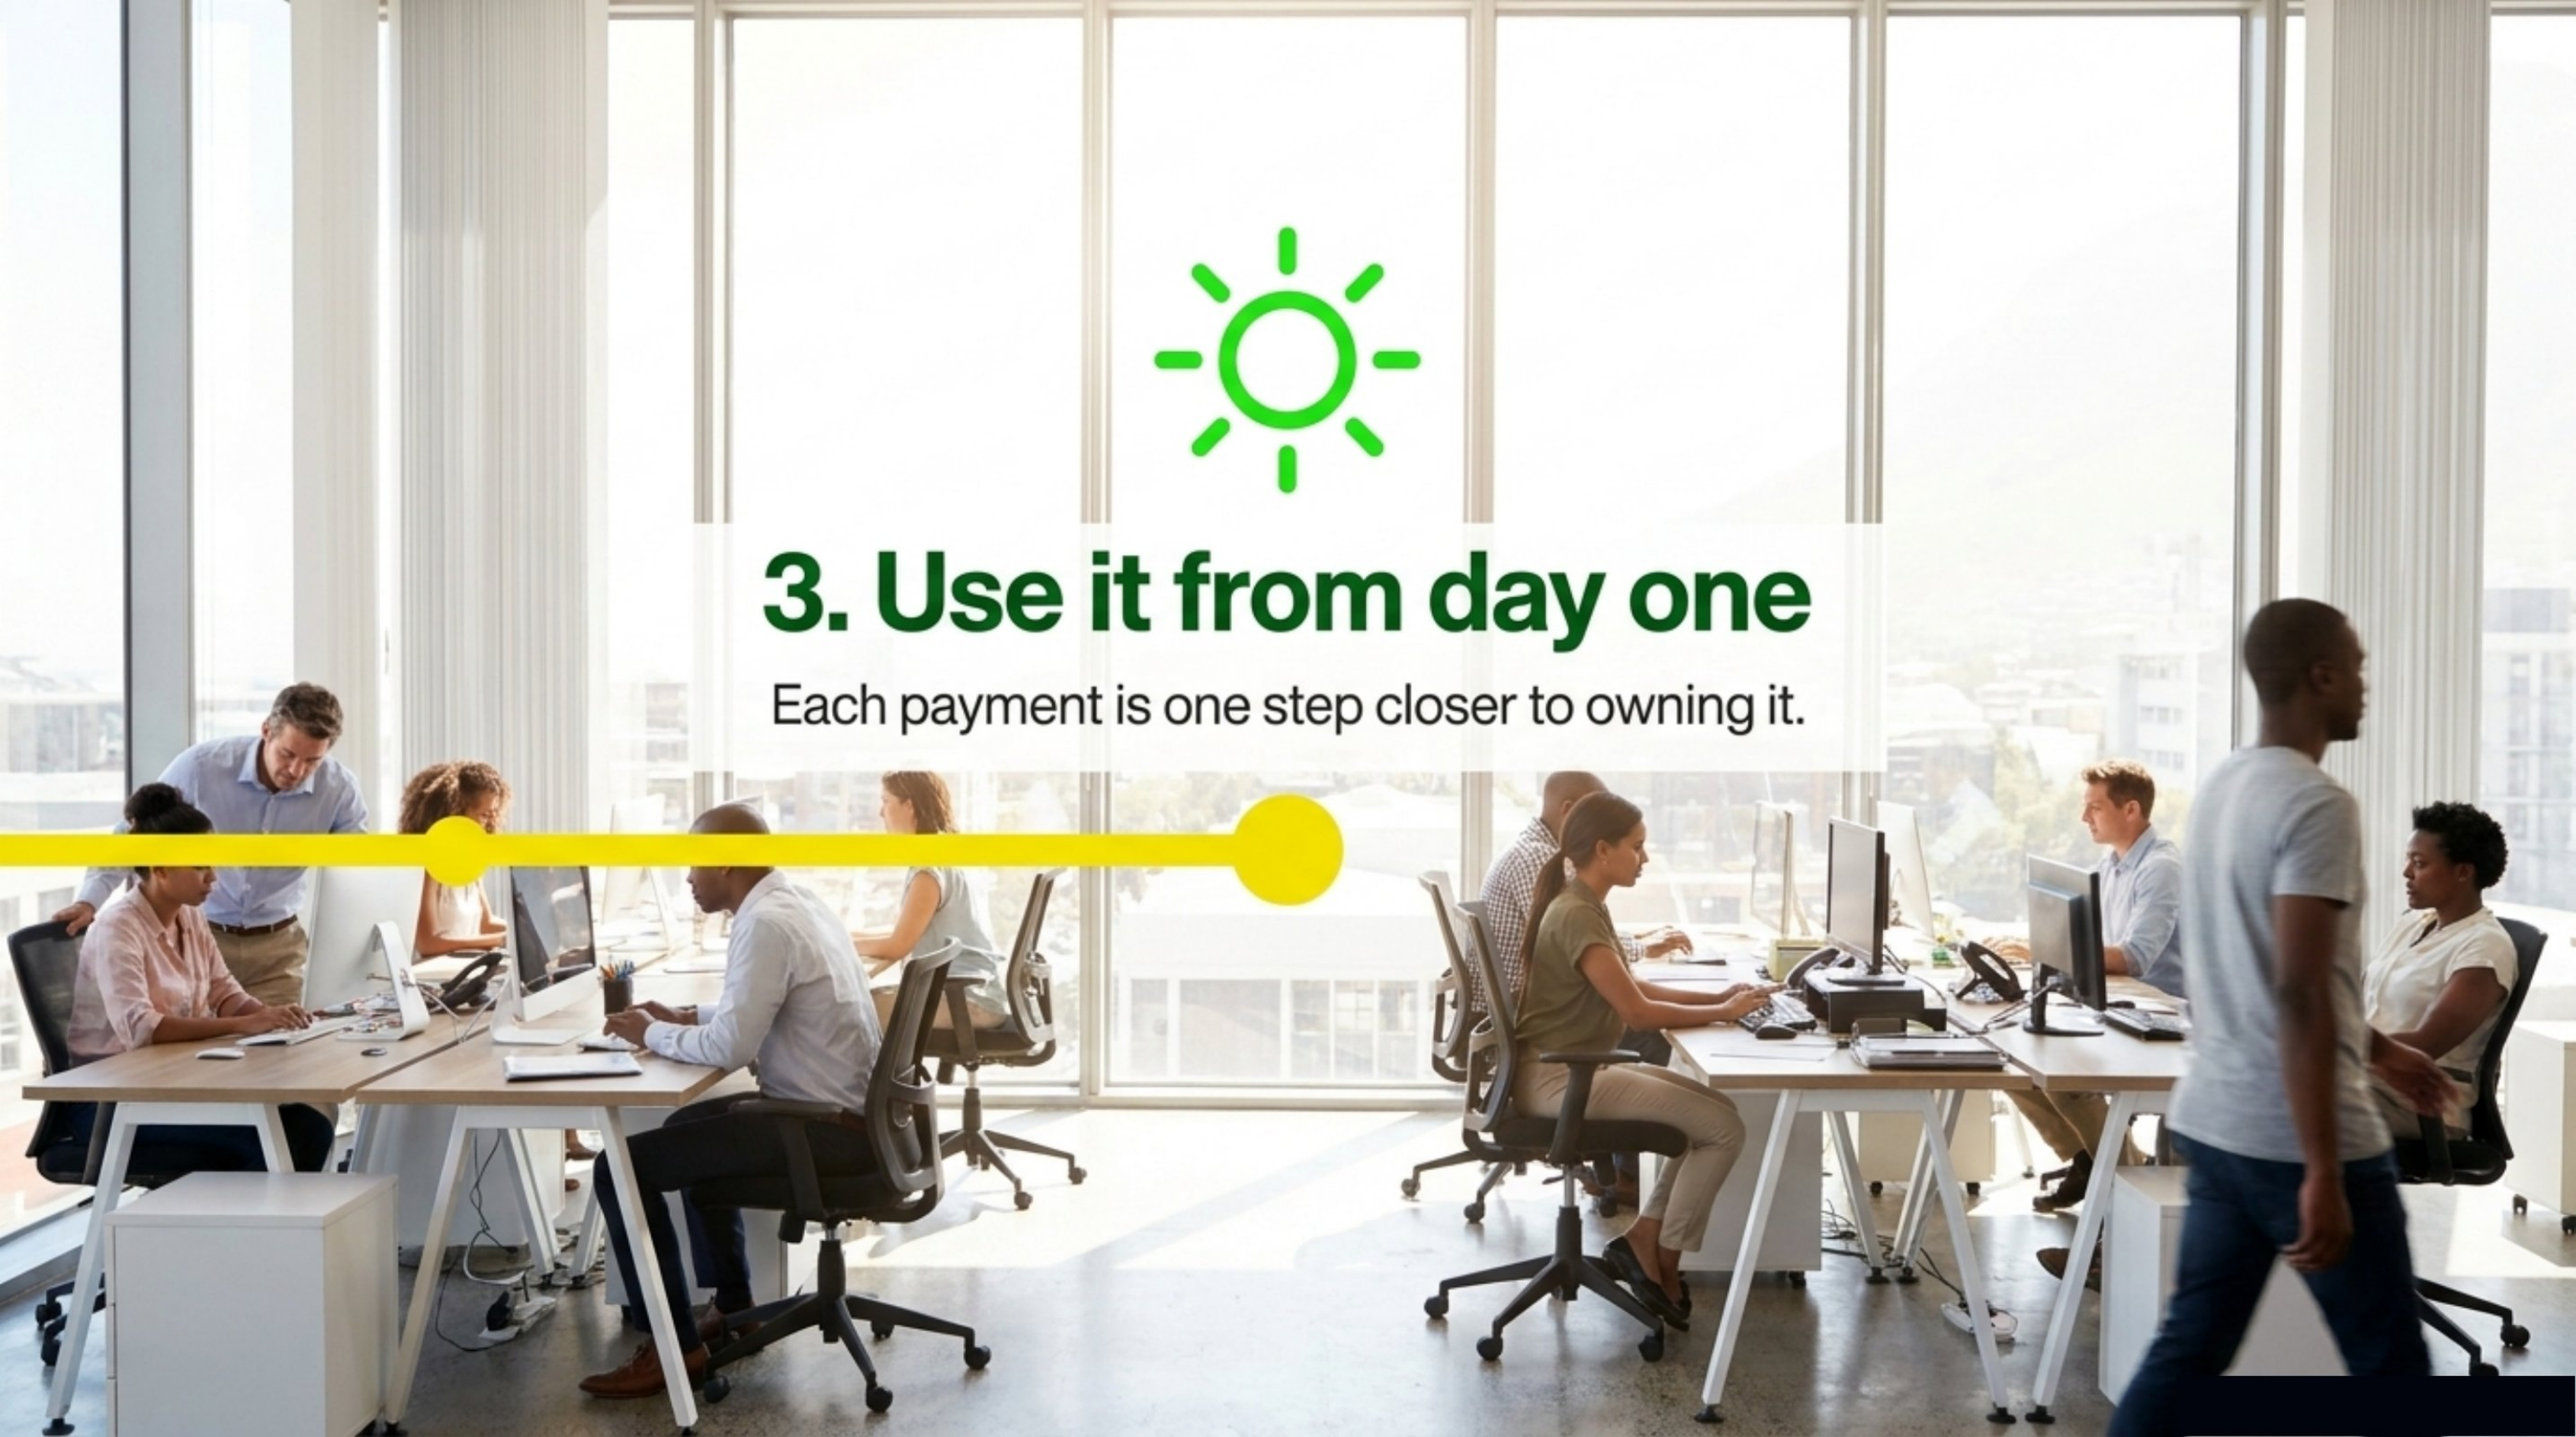

ZenSolar designs systems in house to match your real use, roof space and budget. **No fixed packages.**

2. You sign the agreement

It sets the monthly payment and the term. Ownership passes to you once every instalment is paid.

3. Use it from day one

Each payment is one step closer to owning it.

4. The system is yours

Once every instalment is paid, you own it completely.

Homes: 6 to 16 kW.
One steady monthly budget instead of a big upfront payment.

Businesses: 30 to 300 kW.
Cash stays in the business instead of being tied up in equipment.

Terms run from 3 up to 15 years.

Shorter terms mean higher monthly payments and owning it sooner.

Longer terms mean lower monthly payments and more paid in total.

Questions to ask before you sign

- → Is the payment fixed?
- → What does it cost to own the system at the end?
- → Can I settle early?
- → Who handles the Certificate of Compliance?

The ZenSolar Standard

Structural engineer sign off on every job.

CoC and SSEG applications handled for you.

Installed by our team and preferred, vetted installers approved by the brands.

10-year swap-out warranty

Every system ZenSolar fits carries a 10-year swap-out warranty on the inverter and battery.
